

Final Project Report

PURPOSE	What did you do? (be specific)
---------	--------------------------------

General overview – what is the goal / purpose?

What are the specifications?

What are the rules?

What language is it in?

If you worked in a group: who did what?

If you got code from anywhere else (Internet, book, etc.) you **MUST** give credit to the author/website. (You should also have comments in your program to give credit for sections of code that you got from someone else.)

INSTRUCTIONS	Where is it and how do I use it?
--------------	----------------------------------

Where is your program?

Program name and full location (whose account, what folder, etc.)

How do I use the program?

HINT: you can get screen shots from your program by holding Alt and pressing PrtScrn. Then you can paste this into your report, or paste it into PhotoShop or Paint, crop, edit or annotate it and then copy and paste it into your report. (This looks very professional!)

LEARNING	What did you learn?
----------	---------------------

What knowledge and/or skills did you learn?

Aspects of the language?

Specific topics, such as dealing with images, sound files, networking?

Specific java classes that you used?

Group work?

Project management?

Time management?

What problems did you experience?

How did you overcome them?

ANALYSIS	Evaluate your results
----------	-----------------------

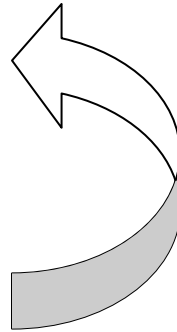

Were you able to accomplish your goal? Did you modify it?

What bugs / problems still need to be solved?

What could you improve or add if you had more time?

Project management cycle (or design cycle)

- Identify the problem
- Analyze the problem
- Brainstorm Ideas
- Evaluate/prioritize the ideas
- Plan a solution
- Implement the solution
- Test and evaluate

and keep repeating!
